

# Screened Sandy Loam

A general-purpose garden soil consisting of sand with a high proportion of organic material that provides an excellent growing medium.

## Description

Screened Sandy Loam is a general purpose soil used for garden beds, for laying turf, as top-dress in some cases, and whenever a good quality topsoil is required.

It consists of sand with a high proportion of organic material. It achieves a good balance between optimal drainage and water retention and is an excellent growing medium that can promote root growth. MQG's Screened Sandy Loam suits residential projects as well as large scale developments including sports fields, golf courses and large parks and gardens.
