

# Turf Sand

Turf Sand is primarily used when laying slab cut turf or sowing lawn seed and can also be used as top dressing in some applications.

## Description

MQG Turf Sand allows good drainage to bed down grass and create a structurally sound surface that can promote future growth. It is ideally suited for sports fields, cricket pitches or golf courses but can also be used as a base layer under artificial turf.

It can also be blended with other materials to create a growing medium that achieves the highest standards for large scale commercial projects to residential developments alike.
